Skills

Javascript, CSS, HTML, React.js, Node.js, JSON, AJAX, MySQL, MongoDB, Firebase, Git, Python, Passport.js, jQuery

Representative Projects

- **Polus:** A chrome extension that helps users plan using calendars. Uses the Chrome Storage API to store user info in the cloud.
- **PlanIt:** A minimalist web app where users can see their notes, train schedule, weather, and food vendors.
- **GitTrack:** An app that allows code instructors access to the number of commits of their students. GitTrack focuses on using graphs to visualize commit number over time.

Education

Full Stack Web Development Course   May 2019 – Aug 2019
UC Berkeley Extension, San Francisco

B.S. Ecology and Evolutionary Biology   Sep 2013 – Sep 2017
University of California, Santa Cruz

Work Experience

Marina Park Dental – Front Office Assistant
January 2020 – March 2020
This position revolved around being the intermediary between the doctor and patients. Primary responsibilities included answering phone calls, confirming patient insurance, and scheduling appointments.

UC Berkeley Extension – Teaching Assistant
August 2019 – November 2019
My time here was spent supporting students through their coding studies, providing counsel for class projects, and leading technology presentations. The goal was to assist the Class Instructor in fostering web development skills as quickly and easily as possible.

California Academy of Sciences – Sales Associate
March 2018 – April 2019
Primary responsibilities in this position included answering guest questions, maintaining strong communication within the guest experience staff, and stationing the point-of-sale position at the entrance of the museum.
