Skills:

React.js, Javascript, JSON, AJAX, SQL, NoSQL, Firebase, AWS, Git, Python, Ruby, Rails, Django, Passport.js, jQuery

Representative Projects:

- *Plan-It*: A minimalist web app where users can see their notes, train schedule, weather, and food vendors. This app focused on using AJAX API calls to get relevant data while Firebase Authentication was to have unique users
- *Best-Gigs*: An ecommerce web app where users can see a predicted average pay from gig apps like Uber, Doordash, and Lyft. This application involved using the machine-learning library Tensorflow.js, MongoDB, and Express.js.
- *Traveler*: A social media platform dedicated to users that are interested in traveling. This app uses React.js to develop a client-side interface, MySQL as a relational database, Express.js as a web framework, and AWS S3 for cloud storage

Education:

Full Stack Web Development Course UC Berkeley Extension, San Francisco	May 2019 - August 2019
B.S. Ecology and Evolutionary Biology University of California, Santa Cruz	September 2013 - September 2017

Work Experience:
